*Notice letter  
for Study*

CERTIFIED MAIL:  
RETURN RECEIPT REQUESTED

Re: Lone Pine Landfill  
Freehold Township, New Jersey

Dear Sir or Madam:

The United States Environmental Protection Agency ("EPA"), hereby notifies you of upcoming work scheduled for Lone Pine Landfill, a site on the National Priorities List of hazardous waste sites. Pursuant to the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA), 42 U.S.C. §9601 et seq., EPA will spend public funds on the work described below and other necessary investigative and corrective measures unless the agency determines the work will be done properly by private parties.

Under section 107(a) of CERCLA and other laws, responsible parties may be liable for any costs incurred by the government in taking corrective actions at the site. Such costs may include but need not be limited to, expenditures for investigation, planning, cleanup of the site and enforcement. By this letter, EPA is notifying you of your potential liability with regard to this matter.

Responsible parties under CERCLA include current and past owners or operators and persons who generated the hazardous substances or were involved in the transport, treatment, or disposal of them. Based on information available to EPA, and/or information submitted by your company, EPA believes that your company may be a responsible party.

346147

Upon request, the Agency will describe the nature of this information to you and will provide additional information on the site. Instructions on how to contact EPA's representative are set forth below.

As you may be aware, EPA has completed a remedial investigation/feasibility study for Lone Pine. Following that study, EPA decided in September 1984 to implement a remedy to contain hazardous substances in the landfill. Design work for this containment system is underway and plans and specifications are expected to be available soon. The containment system selected consists of:

1. A cap over the landfill to reduce further infiltration of surface water and minimize leachate generation;
2. A subsurface cut-off wall to contain contaminated groundwater in the landfill, thus limiting its further migration;
3. Internal extraction wells to reduce the hydraulic head; and,
4. A system to collect and treat contaminated groundwater.

In addition to this on-site remedial work, EPA has also decided that further investigative studies are desirable to more fully delineate the extent of off-site contamination which may have already emanated from the landfill and to determine the need for any further remedial steps. More specifically, the following work is planned:

1. An additional remedial investigation to evaluate further the nature and extent of any off-site release from the landfill. The goals of this investigation include:
  - a) identification of local hydrogeological characteristics to evaluate groundwater quality and movement in the vicinity of the site;
  - b) determination of the extent of soil, groundwater and surface water contamination near the landfill.
2. Feasibility studies to evaluate possible off-site remedial actions for releases of hazardous substances from the site.

(All these further studies will hereafter be referred to as the off-site remedial investigation/feasibility study or off-site RI/FS.)

BY THIS LETTER, EPA OFFERS YOUR COMPANY THE OPPORTUNITY VOLUNTARILY TO ASSUME RESPONSIBILITY FOR (1) THE PERFORMANCE OF THIS OFF-SITE REMEDIAL INVESTIGATION AND FEASIBILITY STUDY AND (2) THE CONSTRUCTION OF THE CONTAINMENT SYSTEM DESCRIBED ABOVE. EPA will move forward with the off-site RI/FS unless you and/or other parties have assumed responsibility for the work by August 26, 1985. EPA will obligate funds for construction of the containment system unless a binding commitment by you and/or others has been made by September 4, 1985 to construct and implement that remedy.

With regard to the off-site RI/FS, EPA has already received indications that private parties may be interested in performing this work. Based upon that interest, EPA has negotiated a proposed administrative order on consent to be issued pursuant to Section 106 of CERCLA. A copy of the order which resulted from those negotiations is enclosed, and further revisions to this order will not be permitted. If your company is interested in participating in the off-site RI/FS, it will be required to sign the enclosed order and to return it to EPA by August 26, 1985.

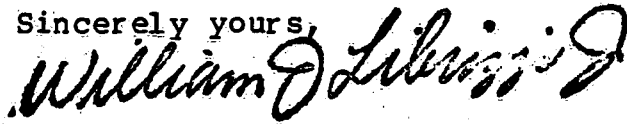

EPA anticipates a request by the recipients of this letter for additional information concerning the proposed activities at Lone Pine. Accordingly, we have reserved a time and place for a conference among all recipients. The conference will be held on Thursday, August 15, 1985, beginning at 10 A.M. in Room 305, 26 Federal Plaza, New York City. Attendance at this conference will provide you with the opportunity to discuss with EPA your responsibility for addressing any problems at this site. The Workplan and Operations Plan for the off-site RI/FS, as well as further information on the design (including cost estimates for the containment system) will be available at this meeting.

Any letter of response should clearly identify - by name, address and telephone number - the person with whom EPA should communicate about this matter. Any letter to EPA should be sent to:

Ms. Janet C. Feldstein  
Site Investigation & Compliance Branch  
Emergency and Remedial Response Division  
U.S. Environmental Protection Agency  
26 Federal Plaza - Room 402  
New York, New York 10278

We have enclosed a list of the addressees of this letter, should you desire contact with each other before the August 15 conference.

Sincerely yours,

A handwritten signature in cursive script, reading "William J. Librizzi". The signature is written in dark ink and is positioned below the "Sincerely yours," text.

William J. Librizzi, Director  
Emergency & Remedial Response Division
